Comments: The UAA was conducted in June 2005 and no WBCR was observed. The stream did not meet the maximum depth or average depth criteria at either of the 2 sites evaluated. No interviews were conducted. The last site was not close to the downstream end of the classified segment. Because this site was so far up the reach, the committee determined that the information provided was not sufficient to make a determination.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
